

# TREE FIELD's brand new coffee grinder "Kirimai," Japan limited model, is now on sale.

~ Kirimai will open the gate for the new era.~

TREE FIELD INC. (HQ: Chuo-ku Tokyo CEO. Kaishun Kihara)

Kirimai, a coffee grinder that draws out the potential of beans by selecting the burr, is now available on the Japan market website. The product will be shipped domestic only, and the export model is underway. We control the quality of the product by completing all the planning, design, and manufacturing in-house. We have invited famous baristas worldwide to test the taste and usability of this new age grinder.

## Kirimai creates the taste by burr.

The "idea" changes the recipe.

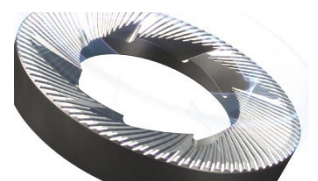

Kirimai will open the gate for the new era.

## The design of the burr produces the taste.

Repeated research to figure out the relationship between taste and design.

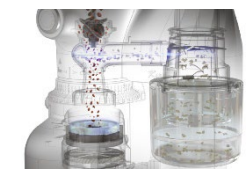

Select the burr to extract the potential of the bean.

## Chaff separation creates a clear taste.

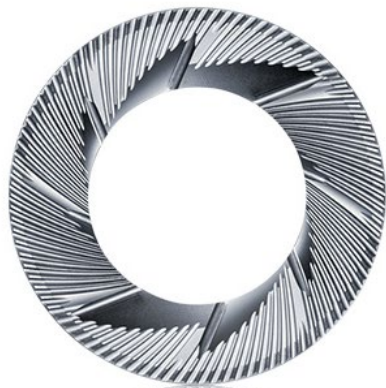

Equipped with the function to remove chaff and fines during the grind.

Expand the possibility of the recipe.

## Specification

Electricity consumption 115W

Voltage/Frequency 100V/50-60Hz

Hopper capacity 500g

Weight 14kg

Price: ¥499,000-(after tax ¥548,900-)

Available at TREE FIELD official website

## **About TREE FIELD**

As a company that makes "innovation for taste," we launched a fully automatic specialty coffee machine, "FURUMAI," in 2019. We realized that "the design of the burr creates the taste" during the development process and conducted further research.

We develop innovative products that change the industry's common sense, such as double grinders, chaff separation, and flat burrs with different flavor tendencies.
